Safe Use of Gas Appliances

General Safety Guidelines

1. Always use gas appliances properly and according to the manufacturer's instructions. Incorrect usage can be dangerous and may lead to accidents or injuries.

2. Regularly inspect your gas appliances for any signs of damage or wear, such as cracks, leaks, or damaged connections.

3. Keep a fire extinguisher nearby and know how to use it.

4. Do not use gas appliances if they are not working properly. Gas leaks can be detected by smell, but it is not always easy to detect a gas leak, as it is odorless.

5. Do not use gas appliances near a water source, as this can cause electrical shock.

6. Do not use gas appliances in a poorly ventilated area.

Safe Use of Gas Water Heaters

- Regularly check the water heater for any signs of damage or wear, such as cracks or leaks.
- Keep a fire extinguisher nearby and know how to use it.
- Do not use the water heater if it is not working properly.
- Do not use the water heater if it is located in a poorly ventilated area.

Safe Use of Gas Cookers

- Regularly check the gas cookers for any signs of damage or wear, such as cracks or leaks.
- Keep a fire extinguisher nearby and know how to use it.
- Do not use the gas cookers if they are not working properly.
- Do not use the gas cookers if they are located in a poorly ventilated area.

Storage of LPG Cylinders

- Store LPG cylinders in a well-ventilated area, away from any sources of heat, such as radiators or stoves.
- Do not store LPG cylinders near electrical appliances, as this can cause an electrical shock.
- Do not store LPG cylinders near a water source, as this can cause an electrical shock.

Make up the Services of the Provided by Approved LPG Distributors (P) Limited
