

HOW TO APPLY FOR REGISTRATION AS A GAS INSTALLER

Purpose of Registration

The purpose of the registration scheme is to ensure that only competent operatives, who have completed approved training, and gained necessary work experience undertake gas installation work, for enhancing the safety of gas users and members of the public.

Who Should Register

Any person who carries out gas installation work, for example, a manual operative and a first-line, direct supervisor, shall be registered with the HKSAR Government.

Classes of Registration

There are eight classes of registration (see Appendix I). They include work associated directly with gas service pipes, all downstream pipework and appliance installations as defined in the Gas Safety (Registration of Gas Installers and Gas Contractors) Regulations, (Cap. 51).

An applicant may apply for any number of classes. To be awarded a class of registration, the applicant must possess the appropriate levels of formal training and work experience as detailed in Appendix II.

How to Apply

Applications for registration as Gas Installers can be made to the Electrical and Mechanical Services Department (EMSD). The procedures for application are as follows:

- (1) Obtain an application form (Form 1 – New Application for Registration as a

Gas Installer/Application for Change of Class of Registration for Registered Gas Installer) from the EMSD Customer Services Office, Ground Floor, 3 Kai Shing Street, Kowloon, Hong Kong.

- (2) Complete the application form carefully according to the instruction sheets attached to the form.
- (3) Submit in person or through a representative the completed application form together with an application fee of \$395 for each application (may be subject to periodic revision) to the EMSD Customer Services Office.

Application fees are not refundable. Therefore, an applicant should not submit more than one application form at any one time.

A Registered Gas Installer Card will be issued to the successful applicant. This card will remain valid until the holder surrenders it to EMSD for reasons such as application for additional classes, retirement, etc. as stated in the Gas Safety (Registration of Gas Installers and Gas Contractors) Regulations (Cap. 51).

For changing classes of registration, the same form (Form 1) and procedures should be followed.

Enquiries

For further information, please call the government hotline 1823.

Note: this leaflet is not a legal document and is prepared for general information only.

Appendix I

Definition of Classes of Gas Installation Work

Class 1 – Installation, commissioning and routine maintenance of a domestic gas appliance which is a hotplate supplied by not more than one cylinder.
