In choosing a registered lift contractor for provision of maintenance services, apart from the price, the responsible person should also consider the registered contractor's background and scale, specific technical knowledge, availability of spare parts, details of maintenance works, time required, emergency response capability, as well as the latest performance rating. After considering these factors, if the responsible person decides to choose a registered contractor with no safety stars or with fewer quality stars under the Contractors' Performance Rating for provision

of maintenance service, the EMSD suggests that the responsible person should step up the management and supervision of the contractor's performance. For instance, the responsible person may specify in the contract a requirement for regular submissions of operational reports of the lift with analysis of the working conditions, failure rates and failure modes. The responsible person should also hold regular meetings with the registered contractor and review the contractor's performance. If necessary, the responsible person should consider engaging an independent consultant to provide independent professional advice.

- Note 3a :** Occurrence of unintended car movement, thus served with one warning letter. The records of non-compliance will be kept for one year until 11/2023 respectively.
- Note 3b :** The ascending car overspeed protection means was found ineffective, and the mechanical car door lock and the associated electrical interlock device defeated, thus served with three warning letters. The records of non-compliance will be kept for one year until 12/2023.
- Note 3c :** The hoisting ropes were found broken, thus served with a warning letter. The records of non-compliance will be kept for one year until 2/2024.
