

Part 1 – Lift and Escalator Installation Summary (* Please delete, if not applicable) Page ___ of ___

Name of Building / Unit / Common Area * _____

Address of Building / Unit / Common Area * _____

Date of Declaration by Registered Energy Assessor in Form EE2 / EE3 / EE4 * _____

Documents submitted (Please tick where applicable.)	No. of sheets
<input type="checkbox"/> Form EE-LE Part 1 : Lift and Escalator Installation Summary	
<input type="checkbox"/> Form EE-LE Part 2 : Traction Lift and Hydraulic Lift Worksheet	
<input type="checkbox"/> Form EE-LE Part 3 : Escalator Worksheet	
<input type="checkbox"/> Form EE-LE Part 4 : Passenger Conveyor Worksheet	
<input type="checkbox"/> Location layout drawings showing the locations of the lifts, escalators & passenger conveyors	
<input type="checkbox"/> A drawing list indicating the title and reference number of each drawing	
<input type="checkbox"/> Manufacturer-issued or contractor * -issued technical documents to indicate the technical data of lifts/escalators/ passenger conveyors in this Form * Refers to the contractor, who is a registered lift contractor / registered escalator contractor (under Lifts and Escalators (Safety) Ordinance, Cap. 327) engaged to carry out the lift and escalator installation so indicated in this Form	
<input type="checkbox"/> A technical document list to summarise all technical document titles and the corresponding model numbers/descriptions of the lifts/escalators/passenger conveyors	
<input type="checkbox"/> Others (Please give details) _____	

Remarks (applicable to Parts 1 to 4) :-

- 1) Ref. Nos. of all lifts/escalators/passenger conveyors in this Form should be consistent with the Ref. Nos. shown in drawings.
- 2) Location layout drawings should :
 - clearly indicate all newly installed/retrofitted lift, escalator & passenger conveyor installation governed by BEC, with reference nos. tallying with reference nos. shown in Parts 2 to 4 of this Form; and
 - indicate the lift, escalator & passenger conveyor installation not governed by the BEC, if shown on the drawing, with an appropriate symbol, marking or colouring different from the ones governed.
- 3) All documents including this Form are for demonstration of compliance with the BEC for the lift, escalator & passenger conveyor installation, and should cover all the relevant items governed by the BEC in respect of the lift, escalator & passenger conveyor installation.
- 4) Should space provided in this Form be inadequate, please provide details with clear cross-referencing on separate sheets and attach to this Form.
- 5) Descriptions and numbering of each installation, system, equipment, building block, floor, room, space etc. in each of Forms EE-LG, EE-AC, EE-EL, EE-LE & EE-PB, should such appear in more than one type of Form, should be identical.
- 6) **Any incomplete or erroneous information in this Form may render this Form being regarded invalid.**

(Please refer to Section 8, Code of Practice for Energy Efficiency of Building Services Installation 2012 Edition)

Part 2 – Traction Lift and Hydraulic Lift Worksheet

Page ___ of ___

(Please tick where applicable)

Any installation of traction/hydraulic lift involved ? (* Please delete, if not applicable)

- Yes, installation of traction* / hydraulic* lift involved (If yes, please provide information in 1) to 7) below)
- No installation of lift involved (if no, please proceed direct to Part 3)

1) Electrical Power (BEC Clause 8.4) (Please provide information in table below)

(All at rated load and at rated speed in the upward direction)

Lift Ref. No.	Lift type		Rated load (kg)	Rated speed (m/s)	Running active electrical power (kW) (BEC Clause 8.4.1 / 8.4.2)	Max allowed electrical power (kW) (BEC Table 8.4.1 / 8.4.2)
	Traction / Hydraulic	Observation lift? (BEC Clause 8.5.4)				
(Please insert additional row if necessary)						
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				
		<input type="checkbox"/> Yes <input type="checkbox"/> No				

2) Lift Decoration Load (BEC Clause 8.5.2)

- For lifts listed in 1) (please tick where applicable)
- the decoration load in the lift car does not exceed the corresponding maximum allowable value given in BEC Table 8.5.2
 - no installation of decoration load is involved

Part 2 – Traction Lift and Hydraulic Lift Worksheet Page ___ of ___
 (Please tick where applicable)

3) Lift Ventilation and Air-conditioning (BEC Clause 8.5.4)

(Please tick where applicable)

(a) The ventilation in each lift listed in 1), except for observation lift, after lift idling for 2 minutes can be automatically shut off until reactivation by passenger call (BEC Clause 8.5.4.1) ?

Yes

(b) Any lifts listed in 1) provided with air-conditioning inside the lift car ?

Yes, and the air-conditioning in each lift, except for observation lift, after lift idling for 10 minutes can be automatically shut off until reactivation by passenger call and resume operation no earlier than 5 minutes after the shut-off (BEC Clause 8.5.4.2)

No lift provided with air-conditioning

4) Lift Parking Mode (BEC Clause 8.5.3)

For lifts listed in 1), any installation of lift bank involved ?

(Please tick where applicable)

Yes, and for each lift bank at least one lift car would operate under a parking mode during low traffic period when the traffic demand is low, and not respond to passenger calls until it returns to the normal operation mode (BEC Clause 8.5.3.1 & 8.5.3.2)

No installation of lift bank involved

5) Total Power Factor (BEC Clause 8.5.1)

For each lift listed in 1), in respect of its total power factor of the motor drive (at the isolator connecting the lift to the building’s electrical supply circuit) at rated load rated speed (traveling upward) (BEC Clause 8.5.1.1)

(please tick where applicable)

the total power factor is not less than 0.85 (BEC Clause 8.5.1.1)

a power factor correction device is installed at the motor control centre of the motor drive to provide the compensation such that the overall total power factor is not less than 0.85 (BEC Clause 8.5.1.3)

6) Total Harmonic Distortion (BEC Clause 8.6)

For each lift listed in 1), in respect of its total harmonic distortion of current (at the isolator connecting the lift to the building’s electrical supply circuit) produced by the motor drive at rated load rated speed (travelling upward)

(please tick where applicable)

the total harmonic distortion is limited to the maximum allowable value specified in BEC Table 8.6.1 (BEC Clause 8.6.1)

a harmonic correction device is installed at the motor control centre of the motor drive such that the overall total harmonic distortion is reduced to a level limited to the maximum allowable value specified in BEC Table 8.6.1 (BEC Clause 8.6.3)

7) Metering and Monitoring Facilities (BEC Clause 8.7)

For each lift listed in 1), for its electrical supply circuit for the motor drive, in respect of measurement of voltages (all phase to phase and phase to neutral), currents (three-phase currents and neutral), total power factor, total harmonic distortion, energy consumption (kWh), power (kW) and maximum demand (kVA)

(please tick where applicable)

metering devices are provided as specified in BEC Clause 8.7.1

the provision for measurement constituting an electrical cubicle or junction box is provided as specified in BEC Clause 8.7.2

(Please refer to Section 8, Code of Practice for Energy Efficiency of Building Services Installation 2012 Edition)

Part 3 – Escalator Worksheet

(Please tick where applicable)

Page ___ of ___

Any installation of escalator (excluding passenger conveyor) involved ?

- Yes (If yes, please provide information in 1) to 4) below)
- No installation of escalator involved (if no, please proceed direct to Part 4)

1) Electrical Power (BEC Clause 8.4) (Please provide information in table below)

(All under no-load condition at rated speed)

Escalator Ref. No.	Type (Non-public Service / Public Service / Heavy Duty)	Rise (m)	Nominal width (mm)	Rated speed (m/s)	Running active electrical power (kW) (BEC Clause 8.4.3)	Max allowed electrical power (kW) (BEC Table 8.4.3)
(Please insert additional row if necessary)						

2) Total Power Factor (BEC Clause 8.5.1)

For each escalator listed in 1), in respect of its total power factor of the motor drive (at the isolator connecting the escalator to the building’s electrical supply circuit) at brake load rated speed (steps or pallets moving upward for escalator with a rise) (please tick where applicable)

- the total power factor is not less than 0.85 (BEC Clause 8.5.1.2)
- a power factor correction device is installed at the motor control centre of the motor drive to provide the compensation such that the overall total power factor is not less than 0.85 (BEC Clause 8.5.1.3)

3) Total Harmonic Distortion (BEC Clause 8.6)

For each escalator listed in 1), in respect of its total harmonic distortion of current (at the isolator connecting the escalator to the building’s electrical supply circuit) produced by the motor drive at no load rated speed (please tick where applicable)

- the total harmonic distortion is limited to the maximum allowable value specified in BEC Table 8.6.2 (BEC Clause 8.6.2)
- a harmonic correction device is installed at the motor control centre of the motor drive such that the overall total harmonic distortion is reduced to a level limited to the maximum allowable value specified in BEC Table 8.6.2 (BEC Clause 8.6.3)

4) Metering and Monitoring Facilities (BEC Clause 8.7)

For each escalator listed in 1), for its electrical supply circuit for the motor drive, in respect of measurement of voltages (all phase to phase and phase to neutral), currents (three-phase currents and neutral), total power factor, total harmonic distortion, energy consumption (kWh), power (kW) and maximum demand (kVA) (please tick where applicable)

- metering devices are provided as specified in BEC Clause 8.7.1
- the provision for measurement constituting an electrical cubicle or junction box is provided as specified in BEC Clause 8.7.2

(Please refer to Section 8, Code of Practice for Energy Efficiency of Building Services Installation 2012 Edition)

Part 4 – Passenger Conveyor Worksheet

(Please tick where applicable)

Page ___ of ___

Any installation of passenger conveyor involved ?

- Yes (If yes, please provide information in 1) to 4) below)
- No installation of passenger conveyor involved

1) Electrical Power (BEC Clause 8.4) (Please provide information in table below)

(All under no-load condition at rated speed)

Passenger conveyor Ref. No.	Type (Non-public Service / Public Service)	Nominal length (m)	Nominal width (mm)	Rated speed (m/s)	Running active electrical power (kW) (BEC Clause 8.4.4)	Max allowed electrical power (kW) (BEC Table 8.4.4)
(Please insert additional row if necessary)						

2) Total Power Factor (BEC Clause 8.5.1)

For each passenger conveyor listed in 1), in respect of its total power factor of the motor drive (at the isolator connecting the passenger conveyor to the building’s electrical supply circuit) at brake load rated speed (steps or pallets moving upward for conveyor with a rise) (please tick where applicable)

- the total power factor is not less than 0.85 (BEC Clause 8.5.1.2)
- a power factor correction device is installed at the motor control centre of the motor drive to provide the compensation such that the overall total power factor is not less than 0.85 (BEC Clause 8.5.1.3)

3) Total Harmonic Distortion (BEC Clause 8.6)

For each passenger conveyor listed in 1), in respect of its total harmonic distortion of current (at the isolator connecting the passenger conveyor to the building’s electrical supply circuit) produced by the motor drive at no load rated speed (please tick where applicable)

- the total harmonic distortion is limited to the maximum allowable value specified in BEC Table 8.6.2
- a harmonic correction device is installed at the motor control centre of the motor drive such that the overall total harmonic distortion is reduced to a level limited to the maximum allowable value specified in BEC Table 8.6.2 (BEC Clause 8.6.3)

4) Metering and Monitoring Facilities (BEC Clause 8.7)

For each passenger conveyor listed in 1), for its electrical supply circuit for the motor drive, in respect of measurement of voltages (all phase to phase and phase to neutral), currents (three-phase currents and neutral), total power factor, total harmonic distortion, energy consumption (kWh), power (kW) and maximum demand (kVA) (please tick where applicable)

- metering devices are provided as specified in BEC Clause 8.7.1
- the provision for measurement constituting an electrical cubicle or junction box is provided as specified in BEC Clause 8.7.2
