

# Outstanding Registered Electrical Worker Awards Scheme 2019

## To Share and be Recognised

### Objectives

1. To constantly encourage registered electrical workers (REWs) and registered electrical contractors (RECs) to promote a work safety culture;
2. To continuously enhance the technical standards of electrical workers;
3. To promote trade paradigms and invite electrical workers and electrical contractors to share their insights/give demonstrations for trade members' reference.

### Eligibility and Enrolment

Participants must be REWs (of any registered grade) in Hong Kong. Prospective participants may complete the enrolment form on an individual basis and submit it before the deadline, or be nominated by the RECs under which they are employed. Each participant is required to submit a separate form, together with his/her insights on electrical work ("insights")/demonstrations of good craftsmanship or processes ("demonstrations") presented in any format\* for selection by the adjudication panel. The "insights"/"demonstrations" can be an excellent demonstration/ process related to electrical work safety, electrical technology or application of innovative technology, etc., which can improve the effectiveness of work safety for trade members' reference.

\* The "insights"/"demonstrations" can be submitted in the form of a written report (no more than 200 words), a PowerPoint presentation (no more than 10 pages) or a short video (approximately 3-5 minutes in length) in Chinese or English. You may also submit it together with photos or audio-visual materials (if any). For submission by e-mail, the size of each mail item shall not exceed 5MB.

Note: REWs who submit applications must not have been prosecuted or have disciplinary action instituted against them for contravening the Electricity Ordinance in the past three years, or else their applications will not be accepted.

Interested participants should send the completed enrolment form to the Electricity Legislation Division of EMSD by mail / fax / e-mail (Address: 7/F, EMSD Headquarters Building, 3 Kai Shing Street, Kowloon / Fax: 2895 4929 / E-mail: competition.eld@emsd.gov.hk) on or before the deadline (20 September 2019).

### Format and Assessment

There are two stages of testing in the selection.

**The first stage** is a written test, which consists of 40 multiple-choice questions in total to ascertain whether the participants possess a relevant level of knowledge in electrical safety (module 1) and electrical technology (module 2).

After ascertaining that the participants possess a relevant level of knowledge in electrical safety and electrical technology, the "insights"/"demonstrations" submitted by the participants at the time of enrolment will be subject to preliminary selection by the adjudication panel so as to select eligible and relatively outstanding submissions (generally no more than six) for entry to the testing in the second stage.

The test in **the second stage** is divided into two parts. **Part A** is a trade test while Part B is an interview. For the trade test in Part A, participants are required to carry out testing for an electrical installation and identify defects in the circuit. The adjudication panel will assess the work procedures and performance of the participants in terms of safety and technical standards.

**Part B** is an interview. Participants are required to further elaborate on the "insights"/"demonstrations" mentioned in their submissions to the adjudication panel.

Participants who wish to give a more detailed explanation of their "insights"/"demonstrations" are welcome to present them in any format (such as a more detailed document/report) to the adjudication panel during the interview. If participants choose to submit the revised "insights"/"demonstrations" in the form of a written report, a PowerPoint presentation or a video, such information may be submitted in Chinese or English two weeks before the interview date (you may also submit it together with photos or audio-visual materials (if any)). For submission by e-mail, the size of each mail item shall not exceed 10MB). Assessment will be made based on the content of the "insights"/"demonstrations". In addition, shortlisted participants will be questioned during the interview. The questions cover different areas, including the quality and applicability of their "insights"/"demonstrations", their understanding of the codes of practice and the laws, and their emergency response, etc. Assessment will be made with respect to the work safety awareness and level of technical knowledge of the shortlisted participants.

Winners will be selected among the shortlisted participants based on their presentation on the "insights"/"demonstrations" as well as their performance in the testing in the second stage.

### Prizes

#### Prizes

Gold Prize  
Silver Prize  
Bronze Prize  
Merit Prize

#### Awards

Trophy and gift vouchers worth \$3,000  
Trophy and gift vouchers worth \$2,500  
Trophy and gift vouchers worth \$2,000  
Certificate and gift vouchers worth \$1,000

Note: Nominating organisations of the gold, silver and bronze prize winners of the Outstanding Registered Electrical Worker Awards Scheme will be awarded certificates as encouragement.

### Details, Enquiries and Enrolment Form

For details or enquiries, please browse the EMSD website at [www.emsd.gov.hk](http://www.emsd.gov.hk) or call 2808 3438.
