

Outstanding

Registered Electrical Contractors Competition

2019

To Share and be Recognised

Certificates awarded to winning organisations of the gold, silver and bronze prizes of the Outstanding Registered Electrical Contractors Competition may be used for promotion in any form.

Objectives

1. To constantly encourage registered electrical workers (REWs) and registered electrical contractors (RECs) to promote a work safety culture;
2. To continuously enhance the technical standards of electrical workers;
3. To promote trade paradigms and invite electrical workers and electrical contractors to share their insights/give demonstrations for trade members' reference.

Categories

"Large Enterprise" category and "Small and Medium Enterprise" category
 ** "Small and Medium Enterprise" is defined as an REC which employs fewer than 50 persons

Eligibility and Enrolment

Participation is in the form of a team, which shall comprise either two or three members (regardless of their position) and be nominated by the RECs under which they are employed. Each company can assign one team representing the company in the competition, and there must be at least one REW in a team. Each participating team is required to submit a separate form, together with a proposal on electrical work safety/quality control ("proposal") from the management perspective expressed in any format* for assessment by the adjudication panel. The "proposal" should be able to improve the overall quality of electrical work or the level of work safety and achieve desirable results (for example, the safety level and quality output can be maintained or even enhanced while saving time or materials in the processes) for reference by the trade.

* The "proposal" can be submitted in the form of a written report (no more than 200 words), a PowerPoint presentation (no more than 10 pages) or a short video (approximately 3-5 minutes in length) in Chinese or English. You may also submit it together with photos or audio-visual materials (if any). For submission by e-mail, the size of each mail item shall not exceed 5MB.

Note: RECs which submit applications must not have been prosecuted or have disciplinary action instituted against them for contravening the Electricity Ordinance in the past three years, or else their applications will not be accepted. Interested parties should send the completed enrolment form to the Electricity Legislation Division of EMSD by mail/fax/e-mail (Address: 7/F, EMSD Headquarters Building, 3 Kai Shing Street, Kowloon / Fax: 2895 4929 / E-mail: competition.eld@emsd.gov.hk) on or before the deadline (20 September 2019).

Format and Assessment

There are two stages of testing in the competition.

The first stage is a written test. Each participating team is required to send one member to answer the multiple-choice questions on electrical work safety. The written test, which consists of two modules with 40 multiple-choice questions in total, is carried out to ascertain that the representative of the participating company possesses a relevant level of knowledge in electrical safety (module 1) and electrical technology (module 2).

After ascertaining that the representative of the participating company possesses a relevant level of knowledge in electrical safety and electrical technology, the "proposal" submitted by the team at the time of enrolment will be subject to preliminary selection by the adjudication panel so as to select eligible and relatively outstanding submissions (generally no more than six) for entry to the test in the second stage.

The testing in **the second stage** is divided into two parts. **Part A** is case analysis while **Part B** is an interview. For case analysis in Part A, the team's representative will be presented with different cases of electrical safety incidents. He/she is required to analyse the cases and propose amendments. Assessment will be made based on the analysis of the representative.

Part B is an interview. The representative of the participating team is required to further elaborate on the "proposal" submitted at the time of enrolment to the adjudication panel, which will assess whether the "proposal" is widely applicable.

Participating teams that wish to give a more detailed explanation of their "proposals" are welcome to present them in any format (such as submission of a more detailed document/report) to the adjudication panel during the interview. If participating teams choose to submit the revised "proposals" in the form of a written report, a PowerPoint presentation or a video, such information may be submitted in Chinese or English two weeks before the interview date (you may also submit it together with photos or audio-visual materials (if any)). For submission by e-mail, the size of each mail item shall not exceed 10MB). Assessment will be made based on the content of the "proposals". Winning teams will be selected among the shortlisted teams based on their elaboration on the "proposals" as well as their performance in the test in the second stage.

Prizes

"Large Enterprise" category

Prizes	Awards [^]
Gold Prize	Certificate and gift vouchers worth \$6,000
Silver Prize	Certificate and gift vouchers worth \$5,000
Bronze Prize	Certificate and gift vouchers worth \$4,000
Merit Prize	Certificate and gift vouchers worth \$2,000

"Small and Medium Enterprise" category

Prizes	Awards [^]
Gold Prize	Certificate and gift vouchers worth \$6,000
Silver Prize	Certificate and gift vouchers worth \$5,000
Bronze Prize	Certificate and gift vouchers worth \$4,000
Merit Prize	Certificate and gift vouchers worth \$2,000

[^] Certificates awarded to winning organisations of the gold, silver and bronze prizes of the Outstanding Registered Electrical Contractors Competition may be used for promotion in any form.
