## Use of Domestic Gas Appliances

### Bearing Mark

The **legislation** stipulated that from 2003 onwards, all models of domestic gas appliances imported for use in Hong Kong shall have the approval of the Electrical and Mechanical Services Department, and the approved gas appliances shall bear a  mark.

Gas appliances installed before the legislation relating to the  mark came into force have already exceeded their average life expectancy. For the sake of safety, please replace them with ones bearing a  mark.
