

住宅 氣體裝置定期安全檢查

Regular Safety Inspection of Domestic Gas Installations

安全告示 SAFETY NOTICE

- ▶ 為安全着想，住戶應安排 / 配合註冊氣體供應公司 / 註冊氣體工程承辦商為其居所的氣體裝置每 18 個月進行一次定期安全檢查，以確保這些裝置狀況良好。
- ▶ 檢查裝置範圍包括：
 - (甲) 管道供應：(1) 氣體爐具；(2) 氣體配件；(3) 氣體接駁軟喉；及(4) 室內外氣體喉管。
 - (乙) 氣瓶供應：(1) 氣體爐具；(2) 氣體配件；(3) 氣體接駁軟喉；(4) 調壓器；及(5) 氣瓶結構。
- ▶ 定期安全檢查完成後，如發現氣體裝置有任何運作異常或不安全的情況，應盡快安排註冊氣體工程承辦商跟進。視乎檢查結果，某些氣體爐具、配件或有需要進行修理或更換，以確保其正常運作，減少潛在氣體故障及事故發生的風險。

- ▶ For safety reasons, occupants should arrange/facilitate the regular safety inspection of gas installations once every 18 months by a registered gas supply company/registered gas contractor to ensure such installations are in order.
- ▶ Regular safety inspection should cover the following scopes:
 - (A) Piped Supply : (1) gas appliances; (2) gas fittings; (3) flexible gas tubing; and (4) indoor and outdoor gas pipes.
 - (B) Cylinder Supply : (1) gas appliances; (2) gas fittings; (3) flexible gas tubing; (4) pressure regulator; and (5) cylinder construction.
- ▶ If any irregularities of gas installations are found upon completion of inspection, please arrange for a registered gas contractor to follow up these irregularities. Depending on the findings of inspection, some gas appliances, fittings may need to repair or replacement in order to ensure normal operation and also reduce the risk of gas failure and occurrence of gas incidents.
