

Remember to Replace Aged Gas Pipes

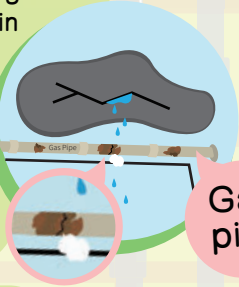

Schedule regular gas safety inspection every 18 months

- Pay attention to the hazard of gas leakage due to aged and concealed gas pipes in the concrete slab/ suspended ceiling

Every 18 months

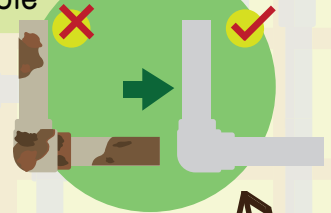

Beware of water seepage issues in buildings leading to gas pipe corrosion and leakage

Gas pipe

Replace the corroded gas pipes as soon as possible

Remind renovation workers to ascertain the location of gas pipes and avoid damaging any gas pipes

Consider replacing aged gas pipes and using exposed gas pipes during home renovation

Engage registered gas contractor to carry out gas installation works

Please check with registered gas supply companies or call 1823 for enquiries.
