抽濕機安全須知

Safety Tips for Dehumidifiers

機電工程署
EMSD

抽濕機應擺放在平穩的地方，並避免放置在浴室內或滴水的衣物下面。

Place the dehumidifier on a flat and firm surface. Do not place the dehumidifier in the bathroom or below the dripping clothes.

保持出入風口及濕度感應器不受阻擋，定期清洗隔塵網。

Ensure that the air intake and outlet grilles and the humidity sensor are not obstructed. Clean air filter regularly.

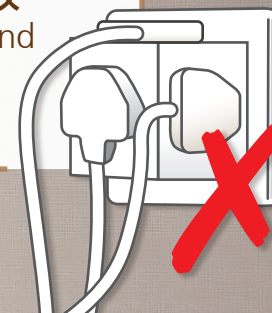

外出前應關掉抽濕機電源。切勿長時間開着致令機件過熱。

Switch off power before leaving home. Avoid prolonged use to prevent overheating.

應獨立接駁到一個固定插座使用，避免在同一個插座插上其他電器或使用拖板。

Connect to a fixed independent socket outlet, and avoid plugging other appliances into a single socket outlet or using an extension unit.

抽濕機如有不尋常現象，例如盛水器有水溢出、發出異常聲音、異味或過熱等，應立即停止使用。

Stop using the dehumidifier immediately in case of anomaly, such as overflowing water tank, abnormal sound, smell or any sign of overheating.
