

Safety Tips for Air-conditioners

Do not connect other electrical appliances to the same socket outlet.

Turn off the switch when the room is not in use.

If the power is supplied from a fixed electrical circuit, the connection work must be done by a registered electrical contractor.

Inspect the air-conditioner's surface to check any damage before use.

If any abnormalities (e.g. excessive noise or vibration, or abnormal smell) are detected, stop the unit and arrange for repair.
