

Safety Tips for Dehumidifiers

Place the dehumidifier on a flat and firm surface. Do not place the dehumidifier in the bathroom or below the dripping clothes.

Connect to a fixed independent socket outlet, and avoid plugging other appliances into a single socket outlet or using an extension unit.

Ensure that the air intake and outlet grilles and the humidity sensor are not obstructed. Clean air filter regularly.

Switch off power before leaving home. Avoid prolonged use to prevent overheating.

Stop using the dehumidifier immediately in case of anomaly, such as overflowing water tank, abnormal sound, smell or any sign of overheating.
