

先停電 • 保安全

**For safety, arrange power suspension
before electrical work**

帶電工作易生意外，會帶來傷亡及財物損毀。如意外破壞電力裝置，更有機會導致更長時間停電。大廈業主、業主立案法團或物業管理公司均應配合註冊電業承辦商安排足夠的停電時間供工程人員進行工作。

Live work can easily cause accidents which may result in death and injury and the loss of property. In the event of the electrical installation being damaged, prolonged power outage may result. Building owners, owners' corporations or building management companies should collaborate with registered electrical contractor to arrange power suspension with sufficient time for workers to carry out the electrical work.
