LPWAN – LORA

EFFICIENT & PRIVATE GOVERNMENT IoT NETWORK

Low Power Wide Area Network

Realised by LoRA

- Private Common Data Sharing Platform
Gov. premise gateways and On-premise network servers
- Long Range Transmission
Sensor-to-gateway (7km) for indoor and outdoor applications

Sensor to Gateway: LoRa (Private Network)

LPWAN – LORA

EFFICIENT & PRIVATE GOVERNMENT IoT NETWORK

Network Layer

- Sensor connectivity independent of mobile network (but not real-time)
- Sensor connectivity to multiple gateways depending on QoS (to reduce chance of data loss)

LPWAN – LORA

EFFICIENT & PRIVATE GOVERNMENT IoT NETWORK

Low Power Wide Area Network

Realised by LoRA

- Private Common Data Sharing Platform
Gov. premise gateways and On-premise network servers
- Long Range Transmission
Sensor-to-gateway (7km) for indoor and outdoor applications
- **Efficient Sensor Deployment**
Battery-operated cost-effective sensor, easy to install
→→→ Massive sensors deployment for digitization and further data analytics & applications

LPWAN – LORA

EFFICIENT & PRIVATE GOVERNMENT IoT NETWORK

Low Power Wide Area Network

Realised by LoRA

- Private Common Data Sharing Platform
Gov. premise gateways and On-premise network servers
- Long Range Transmission
Sensor-to-gateway (7km) for indoor and outdoor applications
- Efficient Sensor Deployment
Battery-operated cost-effective sensor, easy to install
- Diversified applications
Environmental monitoring, Activity detection,
E&M monitoring, Gaseous & Water detection etc.
